USATC, Series 200, Sheet 0203-3HL, 3d ed, Oct 63 (S); NPIC/R-926/64
(TS)

Status: Dismantled

Remarks: A completed skull configuration SA-2 SAM site with 6 revetted launch positions, a revetted central guidance area, and 1 revetted missile-hold position has been observed at this location on [redacted] missions since [redacted]. Within the launch area there were 3 small buildings, and there were 4 support buildings 1,000 ft W of the launch area. The entire site was enclosed by a single fence. [redacted] a radar mound, probably under construction, had been superimposed over a former launch position on the E side of the launch area. A second radar mound, completed and occupied, was adjacent to the outer service road, on the S side of the launch area. A third mound was possibly under construction midway between the central guidance area and a launch position on the W side of the launch area. A former launch position appeared to be in use as a vehicle revetment in support of the radar facility.

By [redacted] the site was no longer active as a SAM launch site but was functioning as an AW radar facility.
